

LOG BOOK

STUDENT NAME:

LEVEL:

NOTES TO THE STUDENT:

The log book is considered as one of the basic requirements for the training course.

It should be completed during the course.

It should be reviewed by tutors at the end of each week.

In case histories you should include at least the following conditions:

1. Respiratory Condition	6. Endocrine disorder
2. Cardiovascular condition.	7. Bleeding disorder.
3. Genito urinary disorder.	8. Anemia.
4. Gastrointestinal Disorder.	9. Infectious disease.
5. CNS and Locomotion disorder.	10. Systemic Protozoal Condition.

DO:

Neonatal reflexes in all babies below the age of three months.

Ortolani & Barlow's tests for all infants.

Measurements for all the cases & to be plotted on the special growth charts.

Read all about the specific drugs prescribed for your cases.

<i>History taking and physical examination</i>			Name	Age	Sex	Causes of admission	Essential Clinical Findings	Essential Investigations	Final Diagnosis	Status at discharge	
	Neonates	1									
		2									
	Early infancy	3									
		4									
	Late infancy	5									
		6									
	Early Childhood	7									
		8									
	Late Childhood	9									
10											

N.B: all the cases should be written in detail in separate sheets and enclosed with the logbook.

<i>Measurements and Maneovers</i>		Temprature	Weight	Length / height	Head circumference	U/L segment ratio	Blood Pressure	Ortolani Test	Barlow Test
	1								
	2								
	3								
	4								
	5								
	6								
	7								
	8								
	9								
10									

N.B: all measurements should be plotted on the special standard charts

Attend and observe closely the following procedures

Scalp vein (Cannula)	1.
	2.
Cannula	1
	2
Femoral Veinpuncture	1
	2
Lumbar Puncture	1
	2
	3
Bone marrow Aspiration	1
	2
	3
Suprapubic Puncture	1
	2

To be seen by the students or demonstrated:

Some specific investigations for your patients.

Incubator care.(NICU)
